

The Ink Pipette is a fast, efficient and clean method of measuring and applying a precise volume of ink to the Ink Proofer.

It has been designed for ease of use and is clearly marked with graduations of 0.1 ml enabling the operator to measure an accurate and repeatable volume of ink up to 1.0 ml in 0.05 ml increments.

The Ink Pipette is manufactured from corrosion resistant stainless steel and brass and can be easily dismantled for cleaning.

Applications:

- Ink
- Printing

Features:

- Strong & robust construction
- Clearly engraved for easy use
- Polished stainless steel surfaces for easy cleaning
- Solvent resistant
- Economical way to find accurate results
